LO JACK[®]
for Laptops

STOLEN COMPUTER RECOVERY SERVICE

Three weeks before the end of spring semester at the University of California at Santa Cruz, Computrace LoJack for Laptops user John Draper had his laptop stolen.

"All of my term papers were on the machine, and that was about 4,000 hours of work. Within a day of my computer calling Absolute, my laptop was back in my hands. Not only that, Absolute saved me from having to retake a semester of classes! The term papers were still there, and I graduated as scheduled with a Bachelor's degree."

**Richard Leon, Inspector,
San Francisco Police Department**

"Computrace is a tremendous tool for law enforcement. I have recovered 100% of the stolen computers Computrace located in my jurisdiction. Without it, I would have had absolutely no chance of finding the missing PCs. I wish everyone used Computrace - it's fabulous."

Your Computer Is At Risk

FACT: Your laptop has a 1 in 10 chance of being lost or stolen this year¹ and according to the FBI, 97% are never recovered. Computers are taken from coffee shops, dorm rooms and automobiles every day. Losing your computer is costly, even devastating when you consider the priceless photos, files and personal information you have stored on your hard drive.

What Is Computrace[®] LoJack[®] for Laptops?

Computrace LoJack for Laptops is a patented software-based theft recovery service that tracks, locates and recovers stolen laptop and desktop computers.

When a computer is protected with this service, software installed on the machine works behind the scenes to silently and securely contact our Monitoring Center and, if stolen, report its location using any Internet connection.

When your laptop or desktop is stolen, our Recovery Team tracks its location and engages local law enforcement to recover and return your computer within 30 days, guaranteed.²

Computrace LoJack for Laptops is the ultimate tool for mobile theft protection!

Experienced Recovery Team

Our Recovery Team can find your computer because they know who to call and where to look. Staffed by former police officers and seasoned professionals, our team works directly with the local law enforcement and Internet Service Providers to obtain subpoenas and warrants. They achieve the highest success rates in the industry simply because they know how law enforcement works.

Protect Priceless Data

Important personal information such as photos, homework, financial records and other data is stored on your laptop and is often irreplaceable or may contain sensitive and private information.

Money-Back Guarantee²

Our Money-Back Guarantee states, if your computer isn't recovered within 30 days of reporting it stolen, we will refund your purchase of Computrace LoJack for Laptops.

Here's How Computrace LoJack for Laptops Works!

- 1 You install the Computrace LoJack for Laptops software and register on our website – it's easy and secure. No hardware required.
- 2 Your computer silently and securely calls our Monitoring Center when connected to the Internet.
- 3 If your computer is stolen, you file a police report and notify our Recovery Team.
- 4 When your stolen computer contacts our Monitoring Center, it is placed on high-alert and starts calling in every 15 minutes, allowing our Recovery Team to closely track your computer's location.
- 5 Our Recovery Team provides law enforcement with tracking information and documentation essential for procuring search warrants and leading them to the location of your computer.
- 6 Law enforcement recovers your computer and returns it to you!
